Project CARES for You

Creating Awareness of Resources in Electronic Safety

Project CARES for You is committed to protecting children on the internet in the community of South Hampton Roads, Virginia by providing information on resources to parents, teachers, guardians, and all others charged with the care, welfare, and safety of children.

This website provides reliable information gathered to assist in the protection of children from unsafe usage of electronic devices. It also gives guidance to parents in the detection and awareness of behaviors associated with one's mental health and how it contributes to the isolation of children and the potential abuse of electronic devices. The goal of PC4U is to spread awareness on this topic through blogs, Facebook posts, and the pamphlets on the website as internet safety is a growing problem around the world.
